Company Information	10

Product Description

Manual BGA Rework Station

Model:WDS-580

- * Repair Success Rate:More Than 99%.
- ***** Using The Industrial Touch Screen.
- ❖ Independent 3 Heating Zones, Hot Air Heating / Infrared Preheat. (temperature accuracy ± 3℃).
- ***** With CE Certification.

Parameter

1	Power	AC 220V±10% 50Hz	
2	Overall dimension	L500mm*W590mm*H650mm	
3	PCB size	Max 400mm*370mm Min 10mm*10mm	
4	BGA size	Max 60mm*60mm Min 1mm*1mm	
5	PCB thickness	0.3-5mm	
6	Weight of machine	40KG	
7	Warranty	1 year	
8	Total power	4800W	
9	Payment way	T/T、Western Union	
10	Usage	Repair chips / phone motherboard etc	
11	Electrical material	Touch screen+Temperature control module+PLC control	
12	Location way	V-shape card slot+Universal jigs	

Product Image

Operation System

- Manual mode.
- Can solder, desolder, mount, pick and replace chip.
- ✤ User-friendly.

Upper up/down moving knob. Front/back moving knob. Flexibility adjust the position of upper heater. Instantly analyze temperature on touch screen, which effectively avoids failed repairing. Instantly analyze temperature on touch screen, which effectively avoids failed repairing. Instantly analyze temperature on touch screen, which effectively avoids failed repairing. Instantly analyze temperature on touch screen, which effectively avoids failed repairing. Instantly analyze temperature on touch screen, which effectively avoids failed repairing. Instantly analyze temperature on touch screen, which effectively avoids failed repairing. Instantly analyze temperature profiles for different temperatures according to different types of BGA. Instantly analyze temperature profiles for different PCB. Same PCB uses same profile. Time-saving. Instantly built-in vacuum pen. Instantly built-in vacuum pen.

Strict Temperature Control System

- 8 segments rising temperature/constant time / temperature rising slope, it can save hundreds of groups temperature curve.
- ✤ It adopting high accuracy K-type thermocouple close-loop control.
- The external sensor can detect temperature precisely, analyze and calibrate the real temperature curve accurately at any time.

Top heater (hot air 800w)

- 1.Reflow vent design ensure focused and even heating effectively increase.
- 2. Top hot air flow is adjustable, to meet the demand of any chip.
 - 3.Top heater can be equipped with different size of nozzles for different size of chips.

Bottom heater (hot air 1200w)

- 1.Height of bottom heater is adjustable.
- 2.Nozzles is different size available for different chips.

Preheating plate (infrared 2700w)

- 1.Infrared heating is more easily absorbed by PCB.
- 2.Infrared heating zone can adjust the output power according to the actual requirement.

Left heater control button Right heater control They can precisely control the infrared heating zones

- 1.Distance between PCB and bottom nozzle can be adjusted with this rotary handle.
- 2.Suitable distance is 1-3mm.

Safety System

- ✤ With CE certification.
- With automatic power-off protection device when abnormal accident happens and double over-temp protection function.

Voice warning 10 seconds before soldering/desoldering process complete.

Packing List

Wisdomshow BGA Rework Product

WDS-620 Power:5300W

WDS-750 Power:6800W

WDS-580 Power:4800W

WDS-650 Power:6400W

WDS-880 Power:9600W

Company Information

- WISDOMSHOW Technology is based in Shenzhen, China.
- We are the Manufacturer= own factory+ machine design+Sheet metal produced by ourself +spray the powder+ strong assemble the machine team + packaging+free training.
- More than 11 years experiences in PCB BGA chips rework station, Over 20 R&D engineers.
- Has been the biggest factory in the BGA rework field in China.
- ✤ HUAWEI,TCL,ZTE,MEIZU,KONKA,LENOVO,FOXCONN vendor.
- ✤ Over 100000 Global User.
